measurement instructions

dimensions

The presence of a subframe is not required in order to install a Barausse door. If a subframe is already installed, measure the opening between the subframe jambs.

W width
Measure the space between the two walls, or between the two jambs of the subframe. Verify that the width is equal top, middle and bottom.

H height
Measure the space between the wall (or the lintel of the subframe) and the finished floor.

D wall thickness
Measure the thickness of the wall, taking into account any tiles or coverings.
